

QCPAbstractPlottable
::setSelectable

QCPAbstractPlottable
::setSelection

QCPDataSelection::enforceType

```
graph LR; A[QCPAbstractPlottable::setSelectable] --> C[QCPDataSelection::enforceType]; B[QCPAbstractPlottable::setSelection] --> C;
```

The diagram illustrates a relationship between two methods of the QCPAbstractPlottable class and a method of the QCPDataSelection class. Two light blue rectangular boxes on the left contain the text 'QCPAbstractPlottable::setSelectable' and 'QCPAbstractPlottable::setSelection' respectively. Two blue arrows originate from the right side of these boxes and point towards a single, wider, grey rectangular box on the right. This grey box contains the text 'QCPDataSelection::enforceType'.
