

QCPDataSelection::operator-=

```
graph LR; A[QCPDataSelection::operator-=] --> B[QCPDataSelection::dataRange]; A --> C[QCPDataSelection::dataRange Count];
```

The diagram illustrates the signature of the `QCPDataSelection::operator-=` method. A central grey box contains the method name. Two blue arrows originate from its right side, pointing to two separate white boxes. The top white box contains the text `QCPDataSelection::dataRange`, and the bottom white box contains the text `QCPDataSelection::dataRange` followed by `Count` on a new line.
