

QCPBarsGroup::append

QCPBarsGroup::clear

QCPBarsGroup::insert

QCPBarsGroup::remove

QCPBarsGroup::bars

```
graph LR; A[QCPBarsGroup::append] --> D[QCPBarsGroup::bars]; B[QCPBarsGroup::clear] --> D; C[QCPBarsGroup::insert] --> D; E[QCPBarsGroup::remove] --> D;
```

The diagram illustrates the relationship between four methods and a central attribute. On the left, four white rectangular boxes are stacked vertically, each containing a method name: 'QCPBarsGroup::append', 'QCPBarsGroup::clear', 'QCPBarsGroup::insert', and 'QCPBarsGroup::remove'. On the right, a single gray rectangular box contains the attribute name 'QCPBarsGroup::bars'. Four blue arrows originate from the right side of each method box and point towards the left side of the 'bars' box, indicating that each method interacts with or modifies the 'bars' attribute.
